

Bram Heetkamp

Tel: +31(0)6-10634268

E-mail: bramheetkamp@hotmail.nl

Address: Hellendoorn, Netherlands

Date of birth: 11 June 2005

With over 5 years of experience in iOS development and almost 3 years as a Product Owner, I am a young, enthusiastic entrepreneur. I continuously learn the latest techniques to develop my skills and share knowledge with others. I am a hard-working individual with a keen attention to detail, and I never give up on a project until the desired outcome is achieved. My group-oriented personality, sense of humor, and ability to create a positive atmosphere make me a valuable asset to any team.

Experiences

PRODUCT OWNER, PROCUL – 2020 - PRESENT

I founded the company to solve my father's frustration with shoemaking software on Windows XP. After speaking with other shoemakers, I recognized the need for user-friendly software, created a plan, and secured investors. Currently, I am leading a healthcare startup that is being built from scratch with a multidisciplinary team comprising of designers, front-end and back-end developers. I actively engage with stakeholders to achieve our goals.

IOS DEVELOPER, INNOVATTIC – 2021 - 2023

At Innovattic, I have had professional growth by working on more than 10 digital projects that were created for positive change. For two projects, I was responsible for releasing updates and all communication. During my time there, I used various tools such as Swift, Git, and Jira. In addition, I have been expanding my skill set by learning new techniques through both self-study and internal projects.

IOS DEVELOPER/WEB DEVELOPER/FOUNDER, MORO ENTERTAINMENT – 2017 - PRESENT

Since 2017, I have been developing apps independently, and in 2019, I founded Moro Entertainment. My passion lies in creating apps that allow me and my friends to have fun while making a positive impact on the world. I have gained experience in innovative app development, design, and feedback implementation. Furthermore, I also create and manage websites for those around me.

WEB DEVELOPER – 2015 - 2017

I learned how to make websites through online tutorials. I not only maintained my parents' websites but also created and sold websites for my friends using HTML5, CSS3, and JS. With the money I saved from these endeavors, I purchased a MacBook to pursue my dream of developing apps.

Skills

- Swift and Objective-C
- HTML5, CSS3 and JS
- React and ReactJS
- Adobe Photoshop/XD and Figma
- Firebase, MySQL, AWS and MongoDB
- Git
- Scrum and Jira
- Python

Hobbies and interests

I enjoy playing the piano and soccer with my friends in my free time. Additionally, I find pleasure in bicycle racing. I am highly enterprising and curious, always eager to learn new things. Therefore, every quarter, I set a new goal for myself, such as running 10 kilometers or learning to play the guitar.

Education

- OBS De Drie Linden/Daltonschool Reggewinde, Hellendoorn - Elementary school, *2009 - 2017*
